Simply space-saving Motorhome under-seat batteries

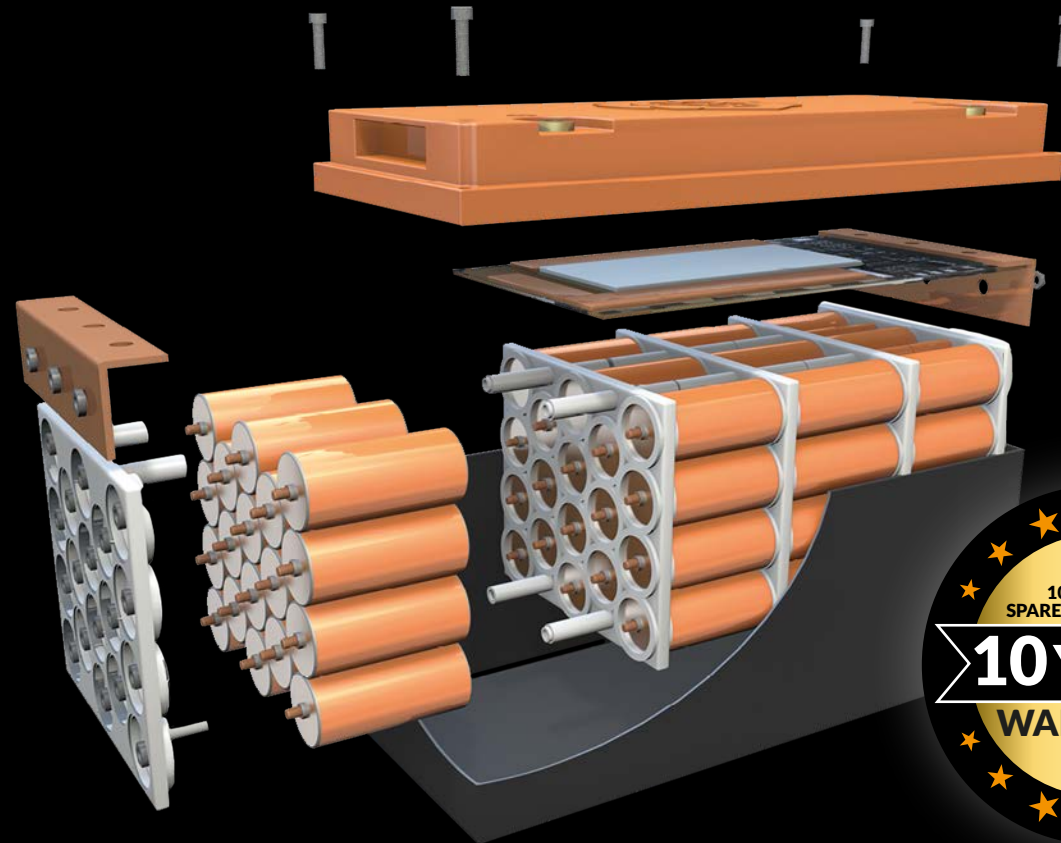

Thanks to the special design, the batteries can be easily installed under the driver's or passenger's seat.

Sustainability through modular design

All components can be replaced for service or repair purposes – without special tools. Functional components are retained.

We are committed to keeping every spare part in stock for 10 years. This means that even after the 10-year warranty has expired, repairs can be carried out cost-effectively and in resource-saving manner*.
